### What has been particularly effective about Aditi Singh's approach to teaching in this course?

- Mastery over material, flexible to student needs, responsive
- Prepared and knowledgeable.
- Aditi has always been a great TA with persuasive skills to convey the learning materials. She specifically used the "virtual white board" for teaching, which is really effective in helping students to understand the knowledge and minimize distractions. She also has great hand-writing, which is another impressive point that I notice. In terms of the expertise, Aditi is a person with in-depth understanding of the lectures - this is reflected by her explanation of concepts and logical, concise strategies of solving problems. She tries to connect the previously learnt materials so that students like me can apply in a broader scale when encountering new types of problems in the future. Aditi is also very available to questions via email, which helps me a lot since learning remotely with different time zone somehow makes it harder to communicate.
- good
- Made herself very available

### What specific advice would you have for Aditi Singh about changes that would enhance your learning?

- No change needed- she's amazing
- N/A
- I think Aditi has been a great TA (the best TA I have ever learnt at Brown!). This is non within the question, but I also really appreciate that Aditi has hosted a TA section which is in totally different time zone from the states (about half a day different) to afford the online learning. It would be greater to learn her in person!
- good
- None

### What has been particularly effective about Aditi Singh's approach to teaching in this course? How did this TA contribute to your learning after the course transitioned to remote learning?

- Aditi challenged the students in his sections with questions and new ways of thinking. He knew his material generally well.
- Very helpful in section, didn't attend her zoom lectures after transition.
- N/A
- The way she explained each question in depth without skipping parts was very helpful. She was also very easy to reach out to and was always receptive to questions.
- would adapt sessions based on students needs

### What specific advice would you have for Aditi Singh about changes that might enhance your learning? Do you have any advice specific to this teaching assistant regarding teaching in the remote learning context?

- Aditi knew his material generally well, but tended to not be able to answer questions outside of the ones he was assigned to present to section. Further, his command of English was OK and understandable enough, but could use some improvement.
- Maybe speaking a little bit louder but nothing really.
- N/A
- She was very good even after we transitioned to online.

**What has been particularly effective about Aditi Singh's approach to teaching in this course?**

- she answers all the questions
- Explanations
- Very calm and easy explanations. Answered email quickly and effectively which was very nice.
- Aditi was always prepared for section and was engaged in helping us learn.
- Aditi is always responsive to emails.
- Aditi tried to simplify concepts and ran through the homework questions methodically.

**What specific advice would you have for Aditi Singh about changes that would enhance your learning?**

- probably speak louder.
- Maybe try engaging students more in office hours
- Sometimes it was hard to see things that you were writing on the board, as you only wrote it on one side and wrote small. This made it difficult to follow your logic with problem solving.
- N/a
- Be louder while in section. Interact with students to see if they're understanding what you're explaining. When you're writing an equation or answer to a problem on the board, turn around and make sure that people can see it. Don't assume that people understand what you're writing or saying. Explaining it from the way that you know it is not necessarily the most effective way of explaining it in section, since most people there are trying to learn the material for the first time and are trying to DEVELOP the intuition that you already have.
